

VIBRANT SOLUTIONS FOR A PURE FUTURE

HIGH-FREQUENCY ULTRASOUND

WATER PURIFICATION

Effective wastewater treatment that reliably **eliminates viruses, bacteria, hormones, and pharmaceutical residues** while rendering **microplastics** harmless. Our systems not only **enhance water quality** but also significantly **reduce energy costs**. They can be mobile on a trailer or permanently integrated into your existing infrastructure.

WELL REGENERATION

Our **globally unique probe** utilizes high-frequency ultrasound to **clean groundwater wells**, penetrating deep into the filter gravel **without** the use of **chemicals**, thereby ensuring an environmentally friendly approach.

The well structure remains preserved, which considerably prolongs its service life. Furthermore, our approach is **swifter**, more **economical**, and **more effective** than traditional methods.
